Ideation Phase
Empathize & Discover

Date	01 October 2026
Team ID	SWTID-2026-6675
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple visual tool used to understand the behaviours, needs, thoughts, feelings, and challenges of the target user. It helps the project team understand the problem from the user's perspective and identify suitable solutions.

For this project, the empathy map focuses on IT support team members who handle incoming service tickets. The map helps identify the difficulties they face during ticket classification and assignment and the benefits they expect from an automated solution.

User: IT Support Team Member

Section	Content
What do they HEAR?	Requests to process tickets quickly; feedback about delayed support; instructions to assign tickets to the correct team.
What do they SEE?	Large numbers of incoming tickets; different types of service requests; manually categorized tickets; incorrect ticket assignments.
What do they SAY?	“Manual classification takes time.” “Tickets should be assigned to the correct team.” “We need a faster way to handle tickets.”
What do they DO?	Receive tickets, read ticket details, identify categories, assign tickets, update status, and track unresolved requests.
What do they THINK & FEEL?	They think about processing tickets accurately and quickly. They feel frustrated by repetitive work and concerned about incorrect classification and delays.
PAINS	Time-consuming manual classification, high ticket workload, incorrect categorization, wrong assignment, and delays in ticket processing.
GAINS	Automatic classification, faster assignment, correct routing, reduced manual effort, and improved ticket-processing efficiency.
GOAL	To process and route service tickets accurately and efficiently with minimum manual effort.

Template

Empathy map canvas

Use this framework to empathize with a customer, user, or any person who is affected by a team's work. Document and discuss your observations and note your assumptions to gain more empathy for the people you serve.
