Acceptance Testing

UAT Execution & Report Submission

Date	01 October 2026
Team ID	SWTID-2026-6675
Project Name	Auto Ticket Classification Using Flow Designer
Maximum Marks	4 Marks

Purpose of Document:

The purpose of this document is to explain the User Acceptance Testing (UAT) coverage and testing results of the Auto Ticket Classification Using Flow Designer project before deployment.

The testing verifies whether the system correctly processes newly created IT incidents and automatically classifies them based on the information provided in the Short Description and Description fields. The testing covers common incidents such as Wi-Fi/network issues, projector problems, password issues, and slow computer problems.

The UAT also verifies that the configured Flow Designer workflow triggers correctly, applies the predefined classification conditions, and updates the appropriate category and subcategory in the incident record.

Defect Analysis:

The following table summarizes the defects identified during UAT

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	0	0	0	0
Duplicate	0	0	0	0	0
External	0	0	0	0	0
Fixed	0	0	0	0	0
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	0	0	0	0	0

Test Case Analysis:

The following table shows the UAT test cases performed for the project

Section	Total Cases	Not Tested	Fail	Pass
Incident Creation	2	0	0	2
Wi-Fi / Network Classification	1	0	0	1
Projector Classification	1	0	0	1
Password Classification	1	0	0	1
Slow Computer Classification	1	0	0	1
Category / Subcategory Update	1	0	0	1
Flow Designer Trigger	1	0	0	1
Total	8	0	0	8

UAT Result:

Total Test Cases: 8
Passed: 8
Failed: 0
Not Tested: 0

UAT Pass Percentage:100%
